METHOD FOR CALCULATING INCOME LIMITS

Income limits are calculated using a set of formula relationships. The U.S. Department of Housing and Urban Development (HUD) estimates median family income based on the most recent census data estimates updated with a combination of local Bureau of Labor statistics data and census divisional data. Separate median family income estimates are calculated for all Metropolitan Statistical Areas, Primary Metropolitan Statistical Areas and Metropolitan Counties.

Very Low-Income Limits:

Income limits are calculated using a set of formula relationships. The very-low income limits are based on 50 percent of the estimated area median income for a four-person family as determined by HUD. Adjustments are then made if the 50 percent number is outside of formula constraints.

More specifically, the very low-income is calculated and set as the tentative four-person family income limit.

If it is lower, the four-person income limit is increased to the amount at which 35 percent of it equals 85 per cent of the annualized two-bedroom Section 8 Fair Market Rent of FMR (this adjusts income limits upward for areas where rental housing costs are unusually high in relation to the median income.

If it is higher, the four-person income limit is reduced to the amount at which 30 per cent of its equals 120 per cent of the two-bedroom FMR (this adjusts income limits downward for areas where rental housing costs are unusually low in relation to the median income);

To minimize program management problems, income limits are being held at the most recent fiscal year levels in areas where the FMR reductions would have resulted in lower income limits; and

In no instance are income limits less than if based on the State non-metropolitan median family income level.

Family Size Adjustments:

Family size adjustments are made to provide higher income limits for larger families and lower income limits for smaller families. The factors used are as follows:

Number of Persons in Family and Percentage Adjustments

1	2	3	4	5	6	7	8
70%	80%	90%	Base	108%	116%	124%	132%

Income limits for families with more than eight persons are not included in the printed lists because of space limitations. For each person in excess of eight, 8 percent of the four-person base should be added to the eight-person income limit. (For example, the nine-person limit equals 140 percent $[132 + 8]$ of the relevant four-person income limit.) All income limits are rounded to the nearest \$50 to reduce administrative burden.

Income limits for Admissions and Continued Occupancy

Based upon the foregoing methodology, the following table sets forth the calculated income limits for admissions and continued occupancy in the Rent Supplement Program. These income limits are adjusted periodically whenever the HUD estimates of area median income are revised and are, therefore, subject to change.
